Example: Finding Investors

Consider an Israeli startup developing a new medical diagnostic method and looking for funding.

Which Angel / VC should it approach?

Example: Finding Investors

Consider an Israeli startup developing a new medical diagnostic method and looking for funding.

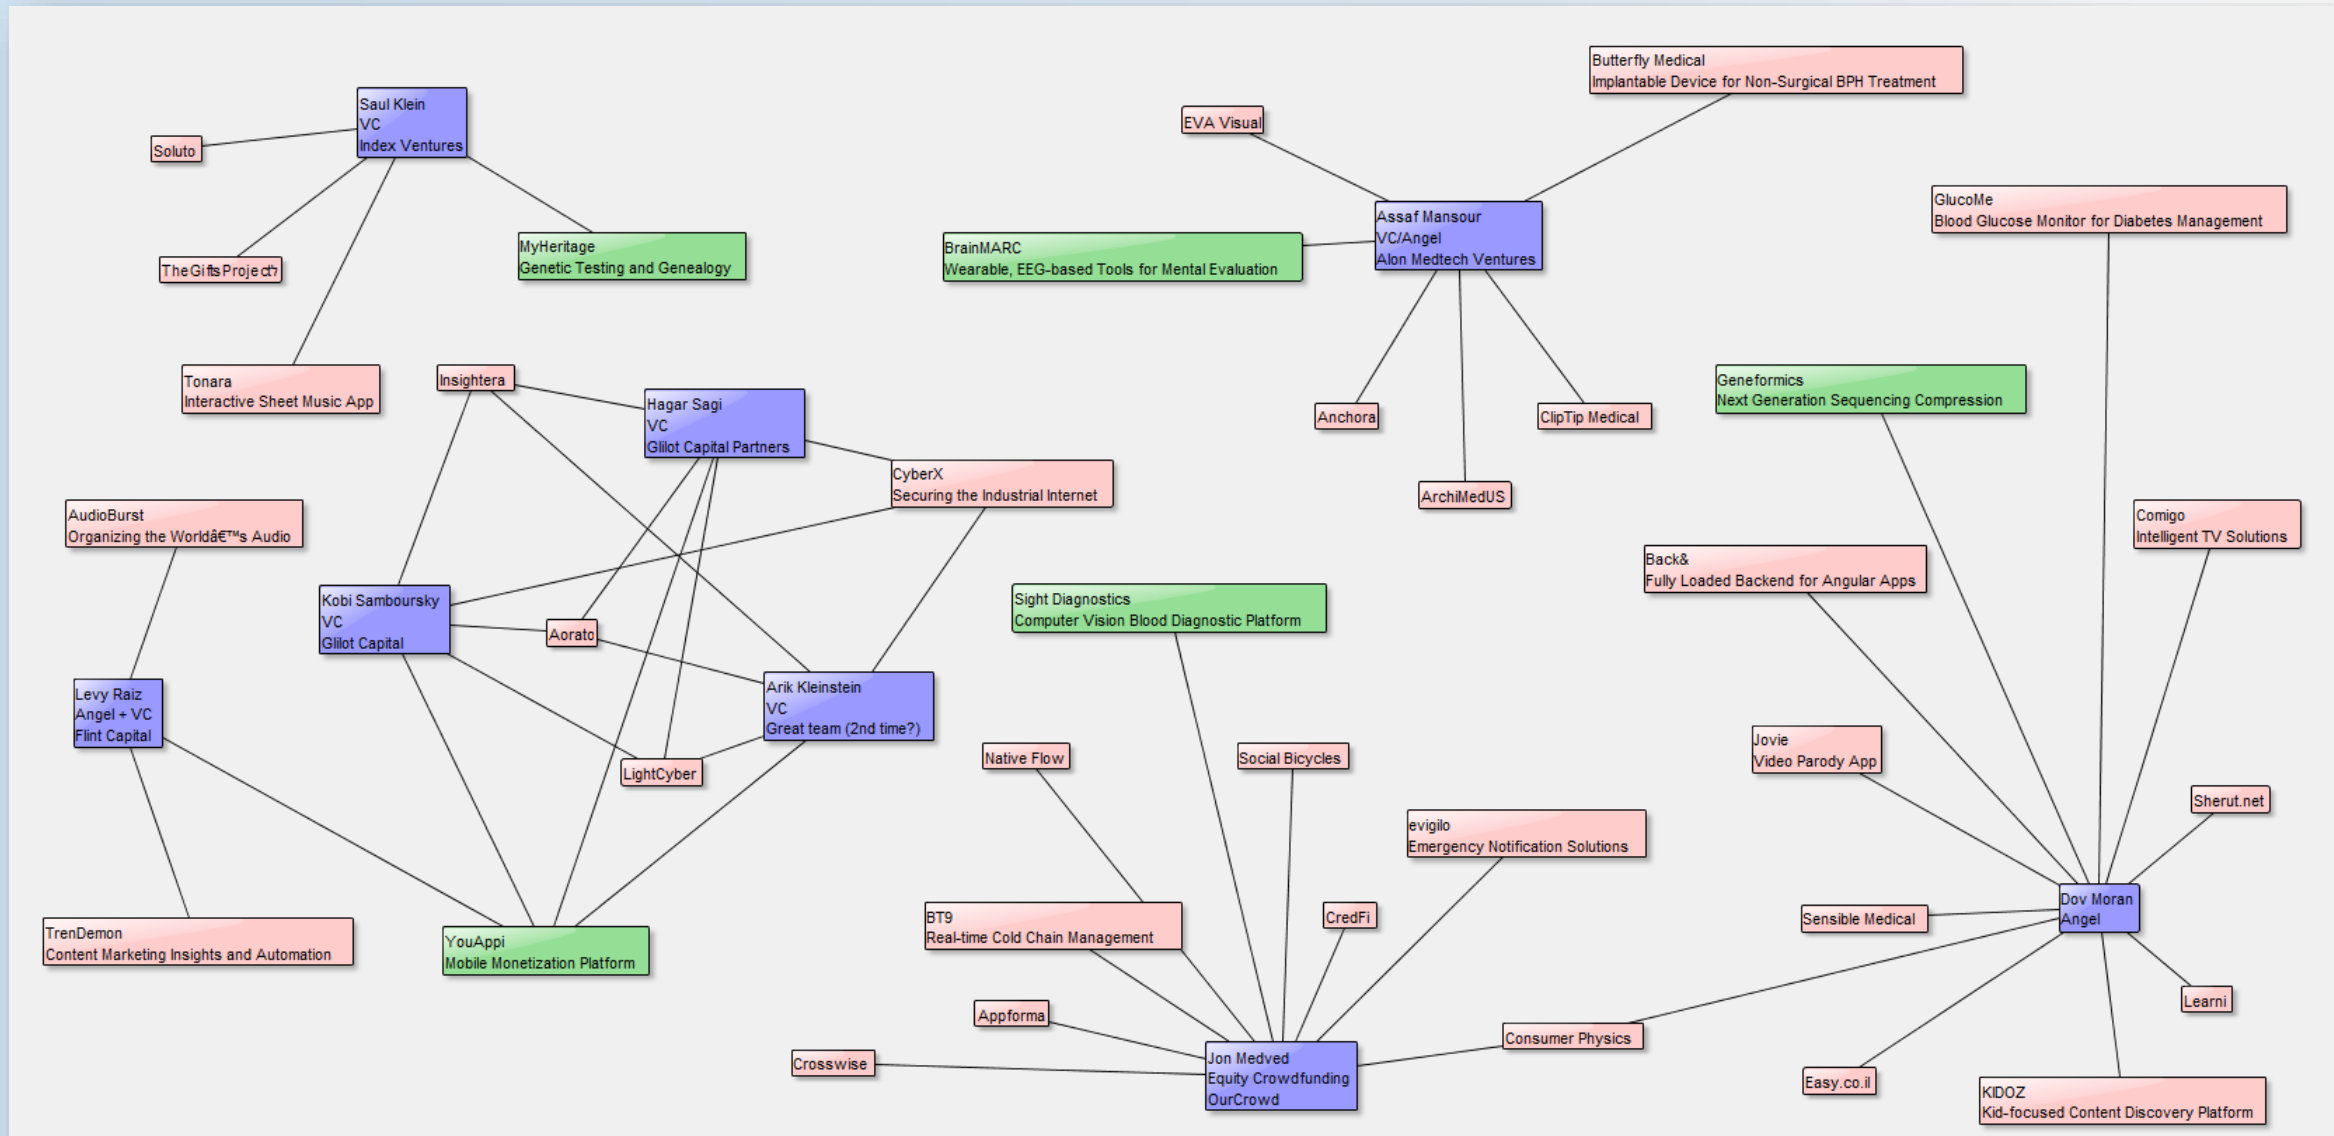

Which Angel / VC should it approach?

Interesting approach:

Find **similar** companies that managed to raise money and see who invested in them

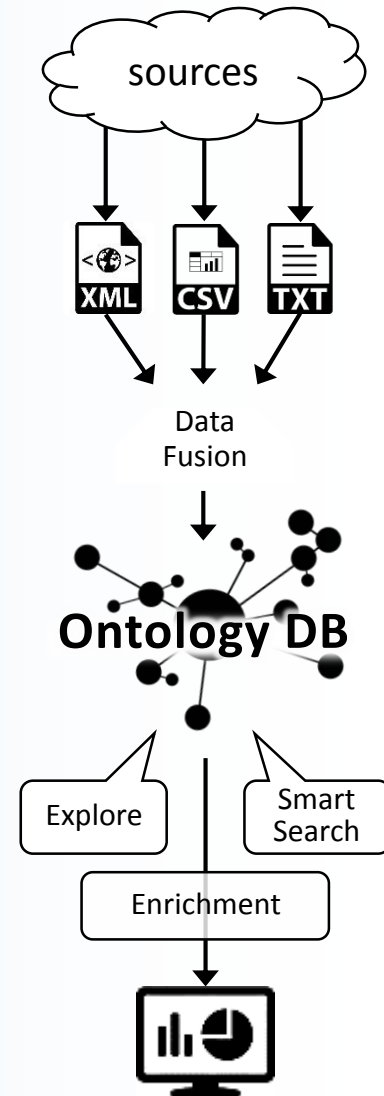

Similar by: product, market, team, development stage, funding stage...

Company

GeneSort

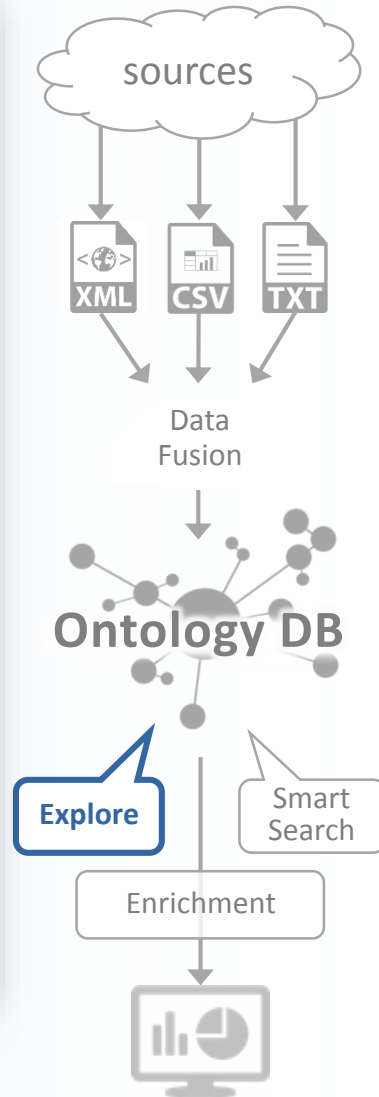

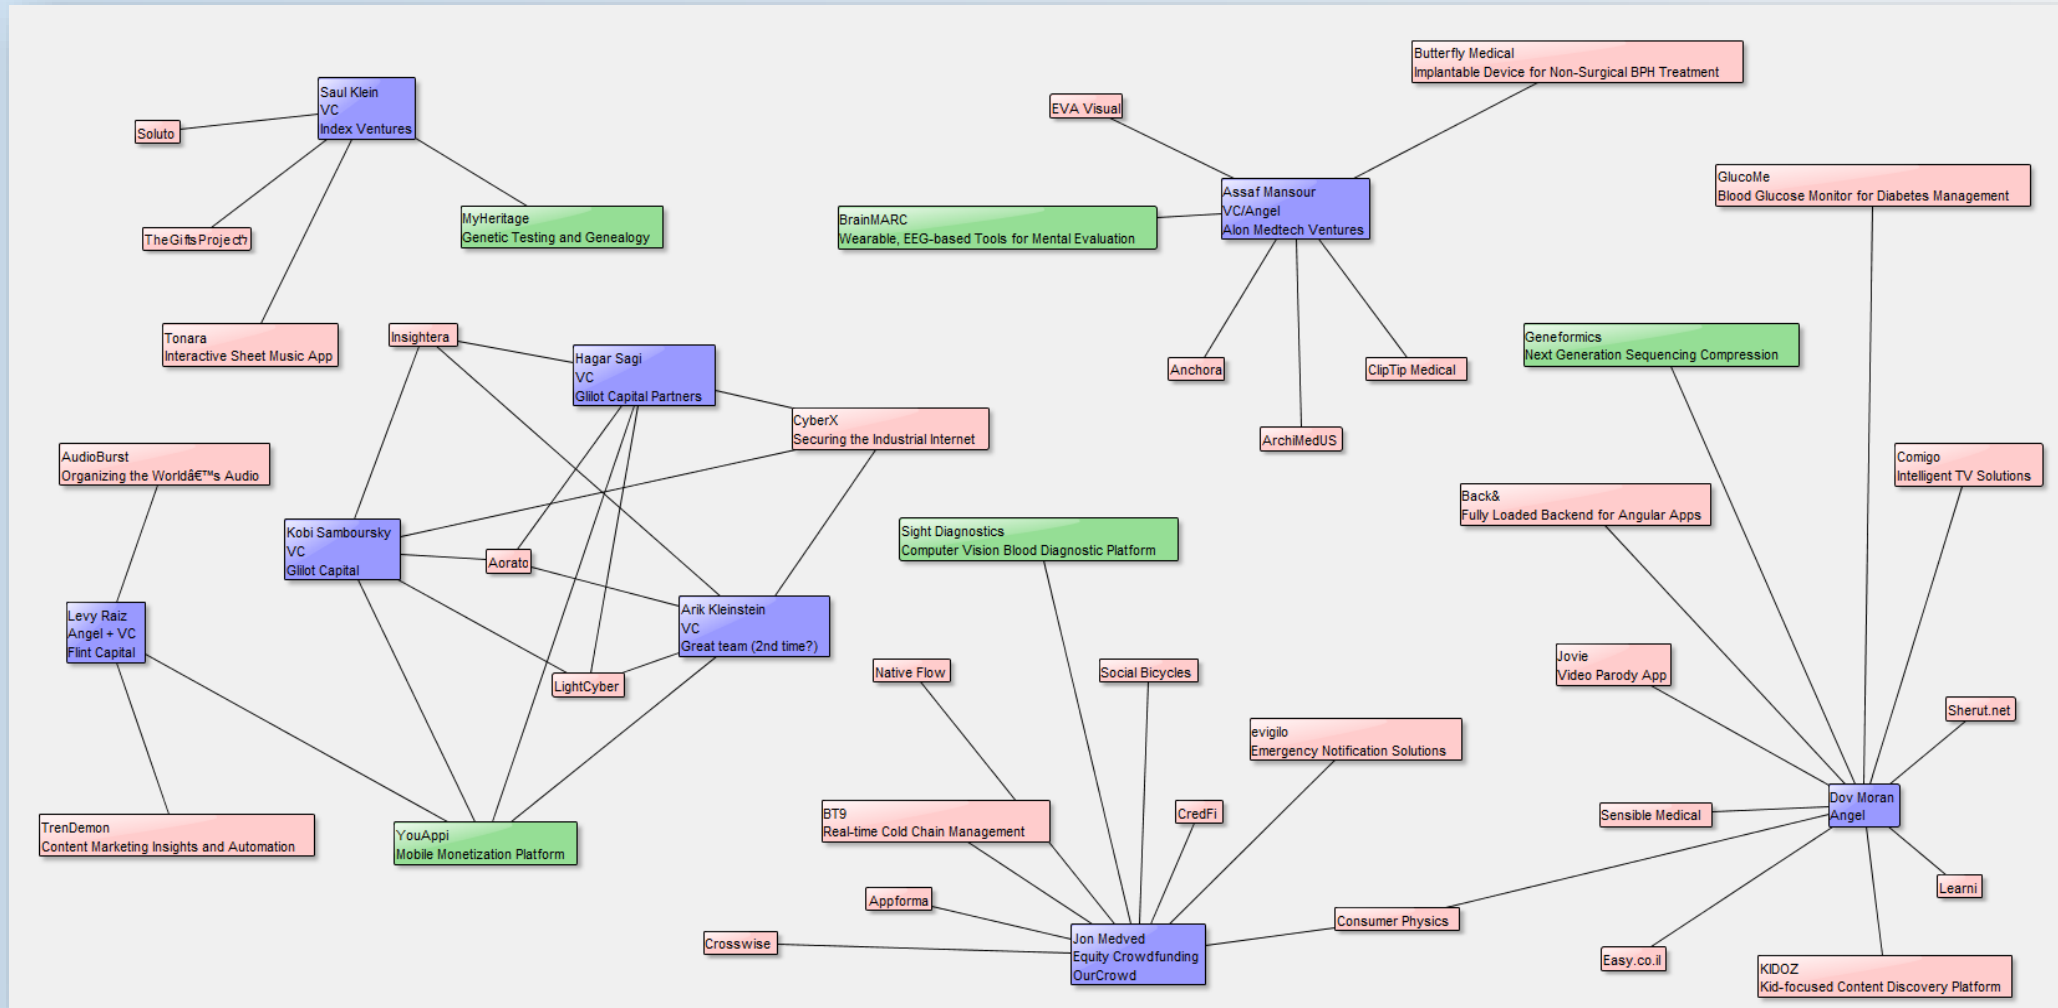

Description

Molecular **Diagnostics**

GeneSort is a molecular **diagnostics** company focused on integrating molecular **genomics** with personalized therapeutic approaches. GeneSort's mission is to use technologies to elucidate the **genetic DNA** profile of different patients and assist physicians in selecting safe and effective treatments tailored to each patient's **genetic** profile. GeneSort is focused on providing **diagnostic** services in cancer and hereditary diseases.

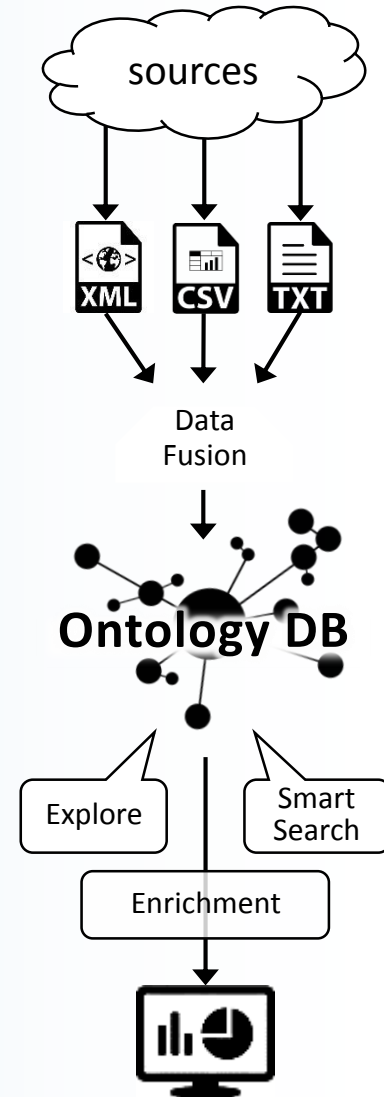

Mission accomplished!

Summary

- Until recently, investigations that required **non-trivial processing of large data sets** were out of reach for the information specialist
- One challenge is building a custom data management system for the relevant investigation.
With the **ontology DB** concept, this becomes as simple as using Excel
- A second challenge is handling data fusion and especially conflict resolution.
The approach presented here brings **data fusion** within the information specialist's reach

Thank You
